Area.—The area of the district has been reduced from 5,940 (1881) to 5,879 square miles to accord with the measurement of the survey carried out in 1871—1902 and owing to the transference of a village to Khándesh District. The táluka variations are:—

Chándvad	+ 1
Dindori	+ 3
Igatpuri	+18
Kalvan	—34
Málegaon	+ 2
Nándgaon	— 6
Násik	+ 5
Niphád	+ 1
Peint	—26
Satána	—19
Sinnar	— 5
Yeola	— 1
Total ...	—61

The area of cultivated land by tálukas shown in the revenue accounts for 1910-1911 is:—

Táluka.	Area in Acres.

Important Public Works.—In 1899-1900 a railway was opened from Manmád on the Great Indian Peninsula Railway, running to Hyderabad. It only traverses a few miles of the Chándor táluka

and the north of the Yeola táluka. Along the five miles of road between Násik City and Násik Station a small Tramway constructed in 1891 maintains communication, carrying over 240,000 passengers in 1910-11. In 1910-11 there were 334 miles of metalled road and 283 miles of road suitable for fair weather traffic only. The new roads and works of importance constructed since 1875 are as follows :—

Famine.—Famine occurred in 1896-97, mainly due to failure of crops in the affected tracts from the want of seasonable rain. The whole district was affected. Relief works were opened and continued for fourteen months. The maximum number of persons receiving relief reached 35,772 in March. In 1899-1900 the rains failed and the district was again visited by famine. The area affected was 5,557 square miles and the crop outturn was 49 per cent. of normal. Relief works were opened in September 1899 and continued till October 1902 with an intermediate break of four months. The maximum daily

average number relieved was 105,664 in March, 12,207 being gratuitously relieved. Special relief to weavers in their own craft was also given during the famine. The death-rate in the district per mille was 76·00. The total number of deaths from all causes on relief works were 4,666, of which 1,374 were due to dysentery and diarrhœa and 1,073 to cholera. The percentage proportion of sexes and children among the relief workers in the district was 35 men, 50 women and 15 children. The average wage per worker unit was Re. 0-1-7. In 1900-01 an area of 2,900 square miles was again affected by scarcity. The highest number in receipt of relief on this occasion was 13,091, 6,418 being gratuitously relieved. The death-rate during the year was 38·50 per mille. In 1901-02 the season was fair. But the relief works, which were closed in December 1901, were re-opened in April and were continued for a period of seven months. The total daily average number of workers was highest in August 1902, about 900 being in receipt of gratuitous relief. The mortality in the district during the year was 30·53 per mille. (For further details see Table XIII.)

Plague.—Indigenous plague first occurred at Igatpuri towards the latter part of July 1897. The infection was attributed to cases imported from Bombay. With Igatpuri several places in the district became infected, of which the most important were Násik town and Manmád. The district suffered very severely between 1899 and 1905 and again in 1911.

SURGA'NA.

Area and Population.—Surgána, which was transferred from Khándesh to Násik in 1890, has an area of 360 square miles. It contains 58 villages with 3,333 houses, and the population shown below :—

		Males.	Females.	Total.
1891	...	6,545	5,853	12,398
1901	...	6,061	5,471	11,532
1911	...	7,884	7,296	15,180

Density of the population in 1911 was 42 persons per square mile. Of the total population 14,882 or 98 per cent. are Hindus ; 256 or 1·5 per cent. are Musalmáns, and 42 are Zoroastrians. The principal caste in the State is the Kunbi (7,811).

Land Revenue and Agriculture.—The State altogether contains 61 villages, of which 46 are *Khálsa* and 15 alienated. Survey operations were commenced in the State in 1895-96. Up to the year 1897-98, only 12 villages had been measured and classed. The cultivators aided by the *Deshmukhs* then began to obstruct the survey parties under the impression that the survey would lead to an increased demand from the State, coupled with a restriction of rights over forests, etc., and operations had to be suspended. This work has not yet been recommenced. The State forest is one of the chief sources of revenue, amounting to Rs. 3,507 in the year 1910-11. The rainfall for ten years ending 1910-11 was :—

General.—The State contains one primary school maintained at an annual cost of Rs. 204 in 1910-11, the number of boys on the roll being 27.

Liquor is sold cheaper in the State than in British territory, and so an arrangement has been made with the *Deshmukh* that no liquor should be sold within three miles of the border of British Territories. The *Deshmukh* is willing to enhance the prices but cannot do so until the neighbouring States of Bánsda and Dharampur have entered into a triangular agreement with the State to increase the prices. The State imports opium from the Huzúr Treasury at Násik, and salt from Surat District. The latter is subject to payment of duty on entering the State.
